

Project 2 Proposal

Chris Albanese

Project Description

My app is named "Thirsty". It's an app to search for local breweries, cideries, brewpubs, and bottleshops. Users can search by either name keywords or by city/town. In the future I'd like to possibly integrate Google Maps to utilize after the search results provides an address.

MVP User Stories

MVP User Stories

- As a user, I am interested in finding local breweries, cideries, brewpubs, and bottleshops.
- As a user, I would like to search by name or by city/town.
- As a user, I would like to see information like street address or a website url.

Post MVP Stretch Goals

- As a user, I would like to see where a brewery is located on a map
